PRODUCT

SQUID KIX MEAL

DESCRIPTION

High digestibility squid meal produced from **selected fresh caephalopod** discards/waste. Manufactured under very careful conditions, with less than 15 minutes in total processing time. The raw material is kept refrigerated (4 °C) until processing. The cooking process lasts for 2 minutes at 90° C, followed by instant drying under a *flash-off* system. The end product is a high protein meal retaining most of the original protein content and with the **highest nutritional standards**, including a **high biological value** and **high water** and **oil retention capacities**.
