PRODUCT: BIOCIDES FOR AQUACULTURE

DESCRIPTION:

Full range of fully biodegradable, environmentally friendly biocides, easy to use and extremely effective against a broad pathogen spectrum, allowing for the development of effective protocols in the prophylaxis, hygiene and disinfection of fish, molluscs and crustaceans in conditions of biosafety. Reliable and safe alternative for many products routinely used in aquaculture (formalin, chloramines, benzalkonium chloride, quaternary ammonium compounds, chlorinated substances etc.) which in many cases have limited effectiveness or result in the generation of dangerous and/or harmful metabolites in the water.

Aquazix® Tablets: Sanitizing formulation for fresh or salt water treatment in basins, ponds, lakes, reservoirs or wells. Wide biocidal activity against Gram-positive and Gram-negative bacteria and fungal spores. Broad fungicidal and virucidal spectrum.

Aquazix® Algae Tablets: Broad spectrum algicide effective against single-cell microalgae (diatoms, haptophytes, *Anabaena* spp.) and multicellular macroalgae (brown, green, cyanophytes). Suitable for the prevention and treatment of undesired algal blooms in fresh, brackish and salt water.

Aquazix® E: General purpose disinfectant for breeding centres and aquaculture on-growing operations (molluscs, fish and crustaceans). Very efficient against Gram-positive and Gram-negative bacteria (*Aeromonas*, *Pseudomonas* and *Vibrionaceae*), bacterial and fungal spores, ciliated protozoa, algae, etc. Liquid formulation with broad-spectrum virucidal, bactericidal and fungicidal activity.

Zix Virox®: Broad spectrum biocide for aquaculture operations (eggs, fish and shellfish). Effective virucidal activity, bactericidal against gram-positive and gram-negative bacteria (*Aeromonas*, *Pseudomonas*, *Vibrionaceae*); fungicidal, sporicidal (against bacterial and fungal spores), antiprotozoal and algicide. May be applied for health prevention and in the treatment of external diseases in fish and crustaceans, egg disinfection, disinfection of tanks, water reservoirs and for the hygienisation of handling utensils.

Clean Zix®: Foaming detergent, concentrated alkaline liquid for use on surfaces with high content in organic matter. Effective disinfectant for the thorough cleansing of all types of surfaces. Strong descaling power, effective for all types of waters, including very hard waters. Easy mixing and rinsing.

OFFER 10% DISCOUNT FROM REGULAR PRICE

OFFER DATE AND VALIDITY: October, 7th, 2013/30 days.

DELIVERY: 15 working days from date of order.

PAYMENT TERMS: To be convened.

ADDITIONAL INFORMATION: Quotation excludes delivery and VAT charges. Final price may vary depending on purchase volume and payment terms. Please contact our commercial address at ventas@acuinuga.com for further details.
