**PRODUCT: SEA BASS DOMESTIC JUVENILES
(*DICENTRARCHUS LABRAX*)**

DESCRIPTION:

Sea Bass (*Dicentrarchus labrax*) juveniles derived from domestic broodstock kept under controlled conditions. Double-graded fish with average body weight= 4 grammes and variation coefficient (CV) under 18%. The number of deformed individuals does not exceed 1%.

Individuals resulting from a breeding programme selecting for high growth rates, optimum conversion efficiencies and strong resistance to disease. Fish vaccinated against *Vibrio* spp. and *Pasteurella* spp. Certified disease-free by Official European Union Veterinary Certification (OEUV) against the main sea bass diseases. Fish fully weaned to dry/extruded diets.
