PRODUCT: MICROALGAE MIX

DESCRIPTION:

Microalgae mix including **marine microalgae**, suitable for the nourishment of most bivalve molluscs and crustaceans. Provides a broad particle size range (2-30 µm), ensuring an **optimal nutritional profile** and increasing **growth** rates and **survival**. One liter of this diet can replace up to 1800 liters of high density microalgae culture. Produced and packed in sterile conditions, it ensures a complete nutrition, enhancing growth and the vitality of the cultivar. Allows for the **reduction** in **operational costs** by diminishing on-site microalgae production requirements, and makes year-round larval production feasible.
